

## **D-Link DGS-3200-10 wins 'Products Edge' Best of Show Award at Interop 2007**

**Japan, 18 June 2007** – D-Link Japan Corporation (Tokyo) International introduced the new D-Link compact and secure Gigabit switch DGS-3200-10 during the Interop Tokyo 2007 exhibition, held from June 13 to 15, and won the 'Best of Show Award' for 'Infrastructure Building Products (Edge)' category.

The Interop 'Best of Show Award' is given to product, solution or service that is the best and most suitable for this year's theme, 'The Internet: Solutions to Accelerate Your Business', based on strict examination by experts from the IT industry as well as a vote of visitors. D-Link DGS-3200-10 switch beats Juniper MX960 to the grand prize, including other product nominations for the category such as Cisco XR 12000 SBC, Cisco Catalyst Compact Switch series (3560-8PC-S, 2960-8TC-L, 2960G-8TC-L, 2940-8TT-S), Alaxala AX1200S, Anagran FR-1000 and H3C(3COM) MSR 30-20 & OAP. For full details, please visit Interop Tokyo 2007 web site at: <http://www.interop.jp/info/bsa/>.

The DGS-3200-10 is a compact Layer 2 secure Gigabit switch with 8 Gigabit and 2 fiber ports. It executes firm network security and comes built-in with universal threat management (UTM) firewall functionalities, which secure the internal IT network against external virus from invading the LAN. In addition to standard quarantine features, it also provides proactive network security with D-Link's ZoneDefense mechanism. The DGS-3200-10 also comes with Microsoft NAP (Network Access protection) and other key features such as user identification, 802.1X certification and MAC address certification through web interface.

The DGS-3200-10, when installed at the edge of networks, provides a complete solution that ensures a safe and secure network, and prevents infected machines from spreading viruses. With built-in access control, the DGS-3200-10 also prevents any illegitimate access by unauthorized people into the network.

### **About Interop**

Interop Tokyo is the pioneering network computing event focused on "interoperability" and the leading educational forum for Japan's network engineers, was first launched in 1994 as NetWorld+Interop Tokyo. In 2005, the event was renamed "Interop Tokyo," and this year will mark the 14th holding of the event. Its primary mission is to offer the latest network devices and solutions, and enable visitors to explore solutions to issues in business environments. The main theme this year is "THE Internet: Solutions to Accelerate Your Business," which will apply to the exhibition, ShowNet and conference program held as part of the event.

### **About D-Link**

D-Link is the global leader in connectivity for small, medium and large enterprise business networking. The company is an award-winning designer, developer and manufacturer of networking, broadband, digital electronics, voice, data and video communications solutions for the digital home, Small Office/Home Office (SOHO), Small to Medium Business (SMB), and Workgroup to Enterprise environments. With millions of networking and connectivity products manufactured and shipped, D-Link is a dominant market participant and price/performance leader in the networking and communications market.
